Essay On Fall of the Roman EMPIRE

What Do you think caused the Breakup
of The Roman Empire and why?

Evidence shows Rome was one of the best Empires in history. Rome ruled for around 1100 years and during that period Rome kept expanding. One may think that the fall of Rome ~~was~~ ^{caused by} several different reasons such as the Goths, The Huns, Life and Economy, The Roman Army, Roman Emperors and Religion in the Roman Empire. All of these reasons played a part in the Breakup some more important than others but all contributed.

Life in Rome was easy for some but not for others, depending on your place in society. Roman slaves were a huge part of the Empire it was thanks to the slaves that many things happened such as the Colosseum, Farming and daily jobs that Emperors and other wealthy people didn't have to do. When Rome stopped conquering other countries slaves would not be bought back to Rome seeing that

②

As Rome took-over countries they ~~bought~~ ^{took} some of the people of the country back to Rome to work as slaves for the wealthy. When slaves stopped coming back the wealthy had to do things for themselves. The wealthy didn't agree with this way of living and some got aggrivated.

The Goths played a big part in the collapse of the Roman Empire. As the Roman's boundaries ~~just~~ kept ~~expanding~~ expanding they came to a bit of a "halt". The Roman's had started to get into the Goths bad books and started to get into the Goths land. The Goths started to fight the Roman's and seeing Rome was getting so big the money the Roman's ^{soldiers} were promised got passed on from country to country. Some Emperors and soldiers took more money than they were s'posed to therefore the last few countries that were s'posed to get the money didn't because some people took too much. The Roman soldiers weren't going to risk there lives and not get paid for it so they decided to go and join the Goths and fight against Roman's Army. With the Goths and some Roman tactics the Goths

3)

defeated the Romans forcing the Romans to decrease and start to retreat.

The Huns along with the goths battling the one ^{Army} ~~country~~ put Rome in jeopardy.

Roman Emperors did not help ^{Some} Rome expand but ^{caused Rome to} decrease because they were so selfish and didn't do the right things for the society. Roman Emperors were usually Ex-Army soldiers that climbed there way up the ranks. seeing that they were part of the Army they treated there Army very well ~~giving~~ sometimes worrying too much about the army than they should by giving them all the money and not worrying about the people of Rome.

Religion in the Roman Empire was ~~to~~ very much based around the fact of having many Gods. When ~~religion~~ the rise of christianity began in Rome the people of Rome didn't really like it for several reasons like there was only one God and many other too.

④

I believe the fall of the Roman Empire was due to the fact it was getting too big and couldn't be organized properly. All the factors of Rome were falling apart at the seams. If Rome didn't take over other Empires Rome may of still been around today.
